## DETAILED ACTION

### 1. *Election/Restrictions*

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 2, 6, 8, 20 drawn to N-heterocyclic compounds and process of making. If this group is elected, a further election of a single disclosed species is also required. Generic claims 1, 4, 5, 7, 9, 10-13, 23-24 reading on the elected compounds can be prosecuted with the election to the extend of the elected compound.

Group II, claims 15-18, 21, drawn to N-heterocyclic quaternary salt wherein R<sup>61</sup> and R<sup>71</sup> are independent substituents. If this group is elected, a further election of a single disclosed species is also required. Generic claims 1, 3, 4, 5, 7, 9, 10, 23-24 reading on the elected compounds can be prosecuted with the election to the extend of the elected compound.

Group III, claims 19 and 22, drawn to spirocompounds and process of making. If this group is elected, a further election of a single disclosed species is also required. Generic claims 1, 3, 4, 5, 7, 9, 10, 23-24 reading on the elected compounds can be prosecuted with the election to the extend of the elected compound.

The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: each group of compounds differ in elements, bonding arrangements and chemical properties and process of making. Unpatentability of any one group of compound would not necessarily imply unpatentability of another group. The search for merit examination for N-heterocycle, an quanternary salt or a spiro-compound are independent , distinct and not coextensive of each other and the search for any one group is not required by another. Therefore, separate examination is required.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the

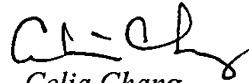

Art Unit: 1625

currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
